Release Notes

The change in this document applies to the January 5, 2018 Dairy.com release. If you have questions or would like additional information, please contact support@dairy.com.

User Interface (UI) Change

The following change applies to the UI.

Drop Yard for Mobile Manifest

Added a Tanker List page that lists loads at a drop yard based on data from Mobile Manifest. A tanker appears on the Tanker List page when a Mobile Manifest driver drops off the tanker. When a Mobile Manifest driver picks up a tanker, it disappears from the Tanker List page.

Corporate Users with access to multiple drop yards can select the from the Drop Yard list to view each drop yard’s status. Drop Yard Managers can only view the status of their own Drop Yard.

Access the Tanker List page from the link on the Milk Home page.
